

# Weekly Report

2019.07.01 - 2019.07.07

---

## daily work

### Monday

1. Encounter a problem to read large file and import it to database. Use much time to deal with it but fail. I think I have to re-train my model and import the training data to database during the training process.

### Tuesday

1. Retrain the model and import data to database during the training process.

### Wednesday

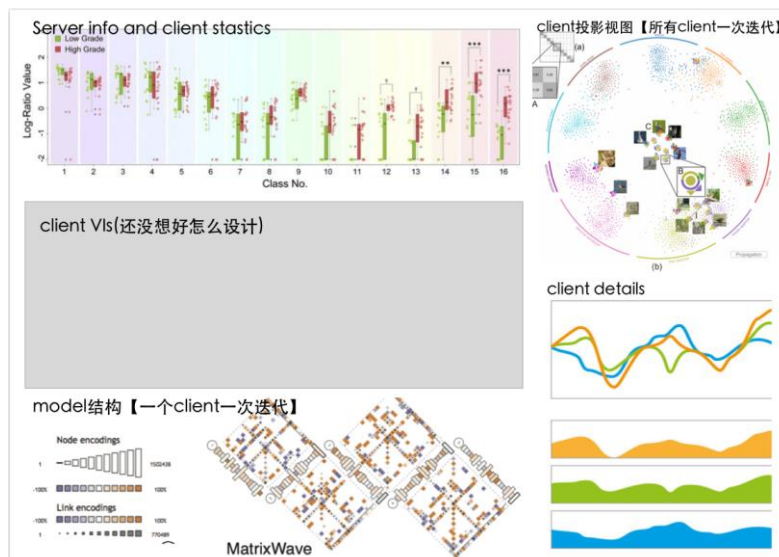

1. Design and implement the functions of front-and-back end interaction.

### Thursday

1. Design and implement the functions of front-and-back end interaction.

### Friday

1. Interface design and layout implementation.

### Weekend

1. VAG Blog: Convert the blog content to markdown type.
2. Front-end development of FLVis.

## Work Plan

1. FLVis: continue coding.
2. SongCi video: make PPT for the video.
